Manager: Vidhita Mittal

I analyze the functional points for the software product in the first release with the most important functionalities (core).

A. External Inputs (EIs)

Function	Complexity	Function Points
Register / login	Simple	3
Create postings: add product	Simple	3
Edit / delete postings	Simple	3
Send message	Simple	3
Confirm transactions	Simple	3
		15

B. External Outputs (EOs)

Function	Complexity	Function Points
Notifications (messages)	Average	5
System successful/fail messages: login or register, listing created	Simple	4
Order confirmed	Average	5
		14

C. External Inquiries (EIs): simple request-response

Function	Complexity	Function Points
View product listings of an user	Simple	3
View product listings of a search/filter	Average	4
View a specific product details	Average	4

View chat history	Simple	3
View past purchases/transactions	Average	4
		18

D. Internal Logical Files (ILFs): system owned data

Function	Complexity	Function Points
Users	Simple	7
Products	Average	10
Postings	Average	10
Messanges	Simple	7
Orders	Average	10
		44

E. External Interface Files (EIFs): external systems

Function	Complexity	Function Points
Payment	Average	7
		7

Type	Total
External Input	15
External Output	14
External Inquiry	18
Internal Logical File	44
External Interface File	7
